

The 1851 Census of England, Wales, Scotland, Channel Islands and Isle of Man was taken on the night of 30/31 March. The completed collection contains detailed information on each individual who spent the night in individual households including name, relationship to the head of the family, marital status, age at last birthday, gender, occupation, and birthplace. Additional information about the dwelling and property was also collected. The Census forms were distributed to all households a couple of days before census night and the completed forms were collected the following day. All forms were meant to accurately reflect each individual's status as of 30/31 March 1851 & the household they spent the night in. People who were travelling or living abroad were recorded at the location where they spent the night.

UK Census 1851
